International healthcare association

JOIN THE IHA TO CREATE A SUCCESSFUL MEDICAL TOURISM BUSINESS

IN THE NAME OF GOD

Greeting

International healthcare association as a government-private organization in 2010 under permission from the Chamber of Commerce, Industries, Mines and Agriculture of Iran, and approved by the Tourism Steering Council of the Republic of Iran in 2015. IHA established to promote Iran’s healthcare facilities and destinations around the Iran. As an official organization for health travel in Iran, IHA is supported by Iran government body like the ministry of health, Iran ministry of foreign affairs, and medical council of Iran and tourism organization of Iran. IHA serves as the “acting body” for a series of national policies regarding health tourism. Over the past 8 years, IHA has undertaken a variety of activities including holding a road show with pride and belief that Iran provides a world-class medical service, besides, it has played a pivotal role in Global healthcare business through supporting to foster human resources in the field of global healthcare. Now a total of 32 renowned teaching hospitals, general hospitals, special clinics and also health cities companies and medical tourism facilitators have joined and actively engaged as a member. Hence forward, IHA will play an active role to contribute Iranian and Islamic countries health tourism providers to strengthen their medical technology & service infrastructures.

I hope that you will be always healthy and happy.

Dr. Jahangiri, Mohammad
President of IHA

About Health travel in Iran  

Iran is not only a beautiful destination in Middle East known for its diversity cultural and historic places and monuments, wonderful natural attractions, scenic beaches and serene backwaters. Of late Iran has gained international attention for health Tourism and is becoming a popular international medical tourism destination. What many tourists have now discovered is that Iran has a pool of experienced, trained doctors and nurses and an excellent network of hospitals that offer international

standard treatments at very affordable prices. Iran destination has high potential for medical tourism development. The geographical location of Iran, existence of numerous hot and cold mineral springs in various parts of the country as well as low-cost and high quality health services in the fields of fertility treatment, stem cell treatment, dialysis, heart surgery, cosmetic surgery, eye surgery and more provide good opportunities to attract health tourists.

- Iran’s Health Tourism strategic council has produced polices, rules and regulations for international tourist healthcare service centers. Those hospitals and clinics that want to offer health tourism services to foreign citizens need to acquire licenses from both the Ministry of Health and the Iranian Tourism Organization named IPD (International patient department).

- The key target market for medical tourism Iran is the Gulf region, taking people who used to go to Europe or troubled local rivals such as Jordan. An increasing number of patients come from Oman, Azerbaijan, Turkey, Iraq, Pakistan and even India.

- Iran offers medical services in ophthalmology, cardiology, kidney transplants, dentistry, urology and general surgery.

### Jam Hospital

Jam Hospital is one of the old and private hospitals in Iran that began working in 1968. The presence of distinguished professors, experienced and committed staffs and consultant doctors make Hospital as a referral center. The mission of hospital is to provide highly specialized health services for diagnosis and treatment patients. Jam hospital is one of the referral canters in Tehran, and patients from different cities of Iran as well as neighboring countries are referred to this hospital for their treatment. Jam hospital is the first private hospital in Iran, and first hospital in Tehran that begin Cytoreductive surgery and Hipec program. Hipec program started in 2015, and with a rising grow it is now the most important center in Iran. The Jam Hospital has a great history and reputation. Jam Hospital is exclusively in possession of 11 CCU beds, and 5 ICU and Open-Heart Surgery beds and 8 CCU beds. It has also 6 active operation rooms which are prepared to accommodate the honorable patients using modern equipment.

**Some goals:**
- Admitting the patients in possession of (primary and supplementary) insurance and the patients enjoying no insurance (free admission);
- Admitting and treating foreign patients (tourism therapy) and utilization of electronic services such as Master Card and VISA Card;
- Employing advanced medical equipment along with modern technology of the world;
- Providing treatment services drawing upon universal standards as soon as possible with the charge less than the similar private centers;
- Offering treatment service in a friendly environment while respecting patients' rights; and,
- Making arrangements for benefit of hotels and travel agencies for convenience of out-of-capital and overseas patients.

Gandi Hotel-Hospital

Gandi Hospital is the first hotel-hospital in Iran, one of the new and private hospitals. In Gandhi Hotel-Hospital, the quality of the provided services to the patients and their families and members is the most important parameter. In this regard, we find it incumbent on ourselves to provide a distinct and comfortable atmosphere for the clients. In Gandhi Hotel-Hospital the quality of services to the patients and their families and partners is of the highest priority for us. Gandhi complex is not just an ordinary hospital founded for simple residency of the patients, but established to welcome clients searching for unique therapeutic and health services not only from within the country but also from all around the world.

In this center services are provided exclusively and distinctively. 24-hour emergency and other specialty and sub-specialty departments provide services distinctively. It is worthy of mentioning that being in accordance with highest international standards in medical equipment and therapeutic and comfort principles are but some unique features of the complex. All the staff in the department are among the bests. These professionals aim to provide the best services for the patients. The International reception takes places through the international patients department from the very beginning of your entrance or even before that. All the procedures pertained to international patients such as outpatients’ reference reception, hospitalization and discharge are carried out in IPD.

<td>Razavi Hospital</td>
<td>In February 2010, the construction works of Ghaem International Hospital was started, and was inaugurated in April 2013. This hospital is 12,000 m in surface area and with a built-up area of over 20,000 m in six floors is located in the city of Rasht in Gilan Province in the north of Iran. Founders of this huge therapeutic project, with the purpose of improving the quality of healthcare services provided to national and international patients, have done their best so that by observing the world’s top standards in constructing the said complex and equipping it with state-of-the-art technologies and competent specialized human resources, they could introduce it as a top healthcare providing facility in the north of the country.</td>
<td>The establishment of the International Patients' Department (IPD) has been an internationally successful and acknowledged move for a thorough handling of the patients' medical procedures. Furthermore, the health tourism office of the ministry of health has obliged all the centers, capable to offer Global Health Care services, to establish the International Patients' Department. Coordinating almost all the services from the IPD physician for a primary examination of the patient, to the in-patients' reception; the discharge unit for an estimation of the clients costs and the security unit for guiding the clients; to coordinating the services with the facilitating company and the follow-up procedures will be the IPD coordinators' duty. The IPD physician will also be responsible for the follow-up of all the clinical services offered to the international patients.</td>

<td>Pars Hospital</td>
<td>Pars Hospital was founded in 1959 by a group of dedicated young European and US graduated doctors. Pars Hospital was the forerunner of all the Private Hospitals and Medical Groups which formed in time. They followed Pars's path and initiated the spread of Private Medical Practice and Treatment as a group in Tehran initially and later throughout the country. At first Pars Hospital was situated in Avenue France comprising less than 40 private bed. As the practice improved and progressed, the Hospital was relocated to a new purpose built site in Elizabeth Boulevard (now re-named Keshavarz Boulevard). The new hospital comprised of a four-story purpose built construction comprising a space of 10,000 square metres within the centre of Tehran and easy access to clients. The hospital has two cath labs, a Post Catheterization ward, ICU, CCU, MRI, CT Scan, a Dialysis Unit, a Radiology Unit and a very active fully equipped Pathology Department. There is regular on-going review of the facilities and equipment to keep abreast with new developments and the latest world standards. Pars Hospital benefits from central air conditioning and to avoid mid city pollution, the system has filtering and moisturizing facility. The operating suite has in addition extra bacterial filters. At present there are 188 beds at Pars comprising of single private rooms, double and three-bedded wards.</td>

<td>International Hospital Ghaem Rasht</td>
<td>In February 2010, the construction works of Ghaem International Hospital was started, and was inaugurated in April 2013. This hospital is 12,000 m in surface area and with a built-up area of over 20,000 m in six floors is located in the city of Rasht in Gilan Province in the north of Iran. Founders of this huge therapeutic project, with the purpose of improving the quality of healthcare services provided to national and international patients, have done their best so that by observing the world’s top standards in constructing the said complex and equipping it with state-of-the-art technologies and competent specialized human resources, they could introduce it as a top healthcare providing facility in the north of the country.</td>
<td>Ghaem International Hospital is equipped with research, R&amp;D, Library and an amphitheater for holding seminars as well. Some of the special advantages of this complex at the provincial level are its being equipped with a heliport and air ambulance, which play an important role in reducing the time for transferring patients, who are in need of urgent care. Having a modern and beautiful physical space, benefitting from state-of-the-art equipment, staffed by well-known and experienced specialists and subspecialists along with having special welfare facilities, have introduced Ghaem Hospital as the first choice of patients for treatments at national and international levels. Also, for the convenience of its patients.</td>

### No. 13. Pastorno Hospital:

**About Hospital:**
Considering the increasing expansion of Mashhad city and medical needs in 1973, by the efforts of the great surgeon, Dr. Abdolhossein Tavakoli Zadeh, we decided to build a private hospital in Mashhad. In 2004, with the decision of the board of directors and the consent of the shareholders to improve the health and well-being of the referrals and set up the medical and specialized departments, to obtain the necessary permits for the construction of 2400 square meters in 6 floors, and with the development of the hospital, the number of rooms Private was added and new operating chambers were equipped with advanced equipment. Currently, the third phase of the hospital is to set up the specialist departments to meet the necessary space requirements according to the standards being underway and construction.

### Special characteristics & services:
- General surgery, cosmetic surgery, otolaryngology, gynecologic surgeries and urology surgeries by specialist and specialist physicians.
- Treatment of cancer patients using IORT technology (radiotherapy during surgery).
- ICU and NICU services with advanced equipment and devices.
- A variety of paraclinical services by experienced professionals and advanced equipment and devices.
- Applying an experienced and ethical clinic to provide the best health and nursing.
- Organizing special classes for mothers with the aim of providing pre-natal care.
- Conducting educational campaigns to raise public health information, such as the "Self Care" Campaign and the "I will test" Campaign.

<td>Moheb-e-Mehr Hospital</td>
<td>Moheb hospital is one of Iranian pioneers in serving foreign patients as a routine service. Since 2004, there were patients coming around the world mostly for Kidney transplantation and urology non-invasive surgeries. Soon the good result of surgeries fascinate patients. Because all the thing a patient wants is a high quality care, comfortable hostelling and reasonable prices. Moheb had all these items and this made Moheb a trusted destination for patients. After a while, Moheb had increased the range of services and complete the diagnostic services which all lead to a good result for the patients.</td>
<td>Even with quality awards, Moheb is proud of results of its treatments for patients. With collaboration by an academic hospital, Moheb has the experience of more than 3000 kidney transplantation, 3900 open heart surgery, and 29000 angiography and angioplasty with world class quality indexes. This is also the subject of many scientific medical articles too. With over 600 beds across 3 hospitals within Iran and a significant presence at every touch-point of the medical value chain, the Moheb Hospitals Group is one of the largest healthcare groups in Iran. Commenced as a 174 bed hospital, today the group has grown exponentially in Iran.</td>

## No. 27. Abu Ali Sina Hospital

### About Hospital

The increasing number of patients with failed organs like kidney, liver, heart, and pancreas requiring organ transplantation from deceased donors with healthy organs necessitate the establishment of an efficient organ transplant center that can handle this great number of patients. And despite the great efforts of doctors and nurses at the Organ Transplantation Center at Namazi Hospital, a large number of patients are still awaiting their turn to receive transplantation. Aiming to solve this problem, with the grace of God, we have established Middle East's greatest, largest, and best equipped organ transplantation center "Abu Ali Sina Organ Transplantation Center", which is going to be not only a transplantation center, but a research, educational, and healthcare facility striving to excellence and advancement in medical science offering great benevolent assistance and excellent practices to patients with organ transplantation needs.

### Special characteristics & services

- Transplantation; Liver Transplantation (Partial, Sipilit, Deceased donor (whole organ), Domino), Kidney Transplantation, Pancreas Transplantation, Multi-organ Transplantation, Small bowel Transplantation, Urology.
- Cancer
- Dentistry and oral surgery
- Dermatology
- Diabetes
- Digestive diseases
- Ear, nose, and throat
- Emergency medicine

## Royan Institute

Royan Institute is a public non-profitable organization which is affiliated to Academic Center for Education, Culture and Research (ACECR) and was established in 1991 by the late Dr. Saeid Kazemi Ashtiani as a research institute for Reproductive Biomedicine and infertility treatments. In 1998 this institute was approved by Ministry of Health as Cell Based Research Center. Now this institute acts as leader of Stem Cell research and also one of the best clinics for infertility treatment. It has 46 scientific members and 186 lab technicians.

Royan consists of three research institutes, each focused on different fields of research:
- Royan Institute for Stem Cell Biology and Technology (RI-SCBT)
- Royan Institute for Reproductive Biomedicine (RI-RB)
- Royan Institute for Biotechnology (RI-B)

<td>29.</td>
<td>Royan stem cell technology &amp; cord blood bank</td>
<td>The latest achievements of biological scientists and researchers have opened new horizons to enjoy such methods and facilities to obtain sustainable health as the infrastructure of sustainable society and longer life. According to researchers, stem cell technology and treatment methods based on such techniques are considered among unique and the best technologies and methods which promote the countries enjoying them. Taking these facts into account, Royan Cord Blood Bank was founded in 2005 to take, proceed and fulfill the required steps in the realm of cord blood banking. Taking advantage of a group of scientists, researchers and experts in the field of Immunology, Hematology and Oncology, right now this center has covered the preliminary steps including storing more than 90000 samples in its public and private banks and opening braches in more than 28 cities nationwide.</td>
<td>Thanks to latest scientific technologies and laboratory devices along with our gifted scientists and researchers, Royan Cord Blood Bank has made great achievements and progresses. The laboratory, freezers, warehouses, library, gathering hall located in different floors of our building are ideally designed and equipped with functional tools to facilitate any kind of study, research and experiment. What we are racing ahead is catching up with other cord blood banks and taking measures to manufacture a vast variety of products in the realm of cord blood so that patients draw benefit of them.</td>
